## 1. General features

### 1.1. Access to Interface

Elixir is a web-based application. It can be accessed from <http://elixirapp.live/>

*Note: The browser recommended for Elixir is Chrome and Firefox, and the screen resolution is 1920 \* 1080.*

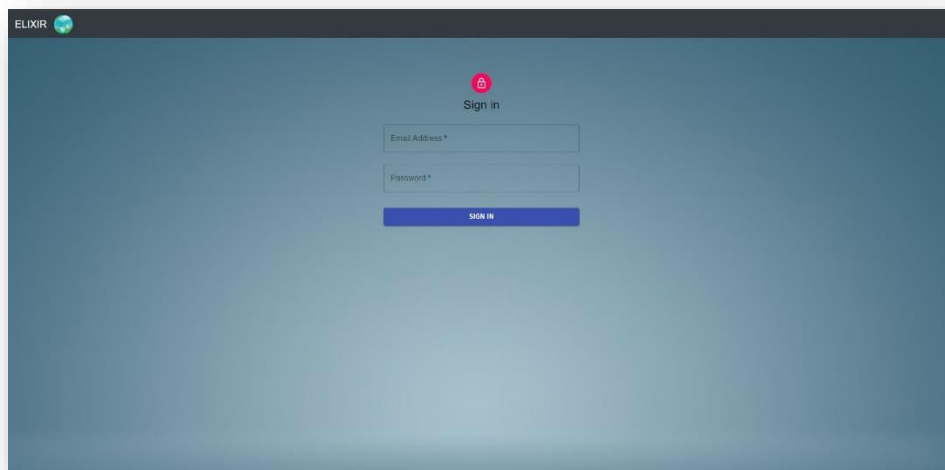

Figure 1: Login Page

### 1.2. Login

The user must enter their **Username** and **Password** and click the **Login** button to access Elixir

The image shows a login panel with a light blue background. At the top center is a red circular icon with a white padlock. Below it, the text 'Sign in' is centered. There are two input fields: 'Email Address \*' and 'Password \*'. Below these fields is a blue button with the text 'SIGN IN' in white capital letters.

Figure 2: Login Panel

If the wrong **Username** or **Password** information are entered an error message will be given.

### 1.3. User Profile

To access the user profile page, use the Change Account Details option located in the upper left part of the navigation bar. Then click to access it.

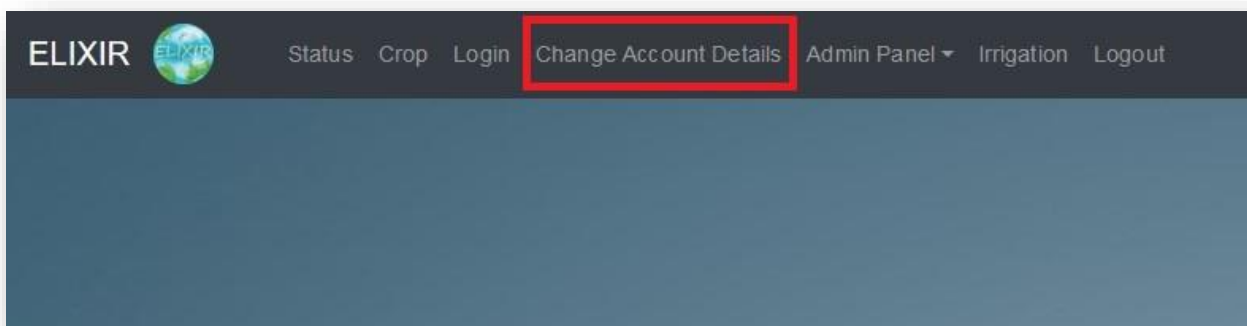

Figure 3: Access to Account Details

This section has two options **Change Email** and **Change Password**.

The image shows a mobile application interface with two distinct sections for account management. The top section, titled 'Change Email', is marked with a red envelope icon. It contains a text input field labeled 'Email Address \*' and a blue button labeled 'CHANGE EMAIL'. The bottom section, titled 'Change Password', is marked with a red key icon. It contains a text input field labeled 'Password \*' with masked characters (dots) and a blue button labeled 'CHANGE PASSWORD'.

Figure 4: Options in Account Details

The user can change his/her password within this panel. To do this, enter the new password in the **New Password** fields. In order to change the password, the following criteria must be met:

- Password must contain at least 8 characters.
- Password must contain both numerical and alphabetical characters.

If these conditions are met the user will be able to change their passwords by clicking the **Change Password** button.

The password is not updated in the following situations and the user is warned:

- The new password does not meet the requirements.
